OUR NAME

Stone Polymer Composite (SPC) is the next generation of core for multi-layer flooring. The extreme density and stability of SPC core is a better choice for the various types of luxury vinyl products being made today. SPC is applicable to various flooring products including direct print technology, woven surface products, hardwood veneers and sports floors. The possibilities are unlimited in this fast growing category. The one common denominator: the SPC core.

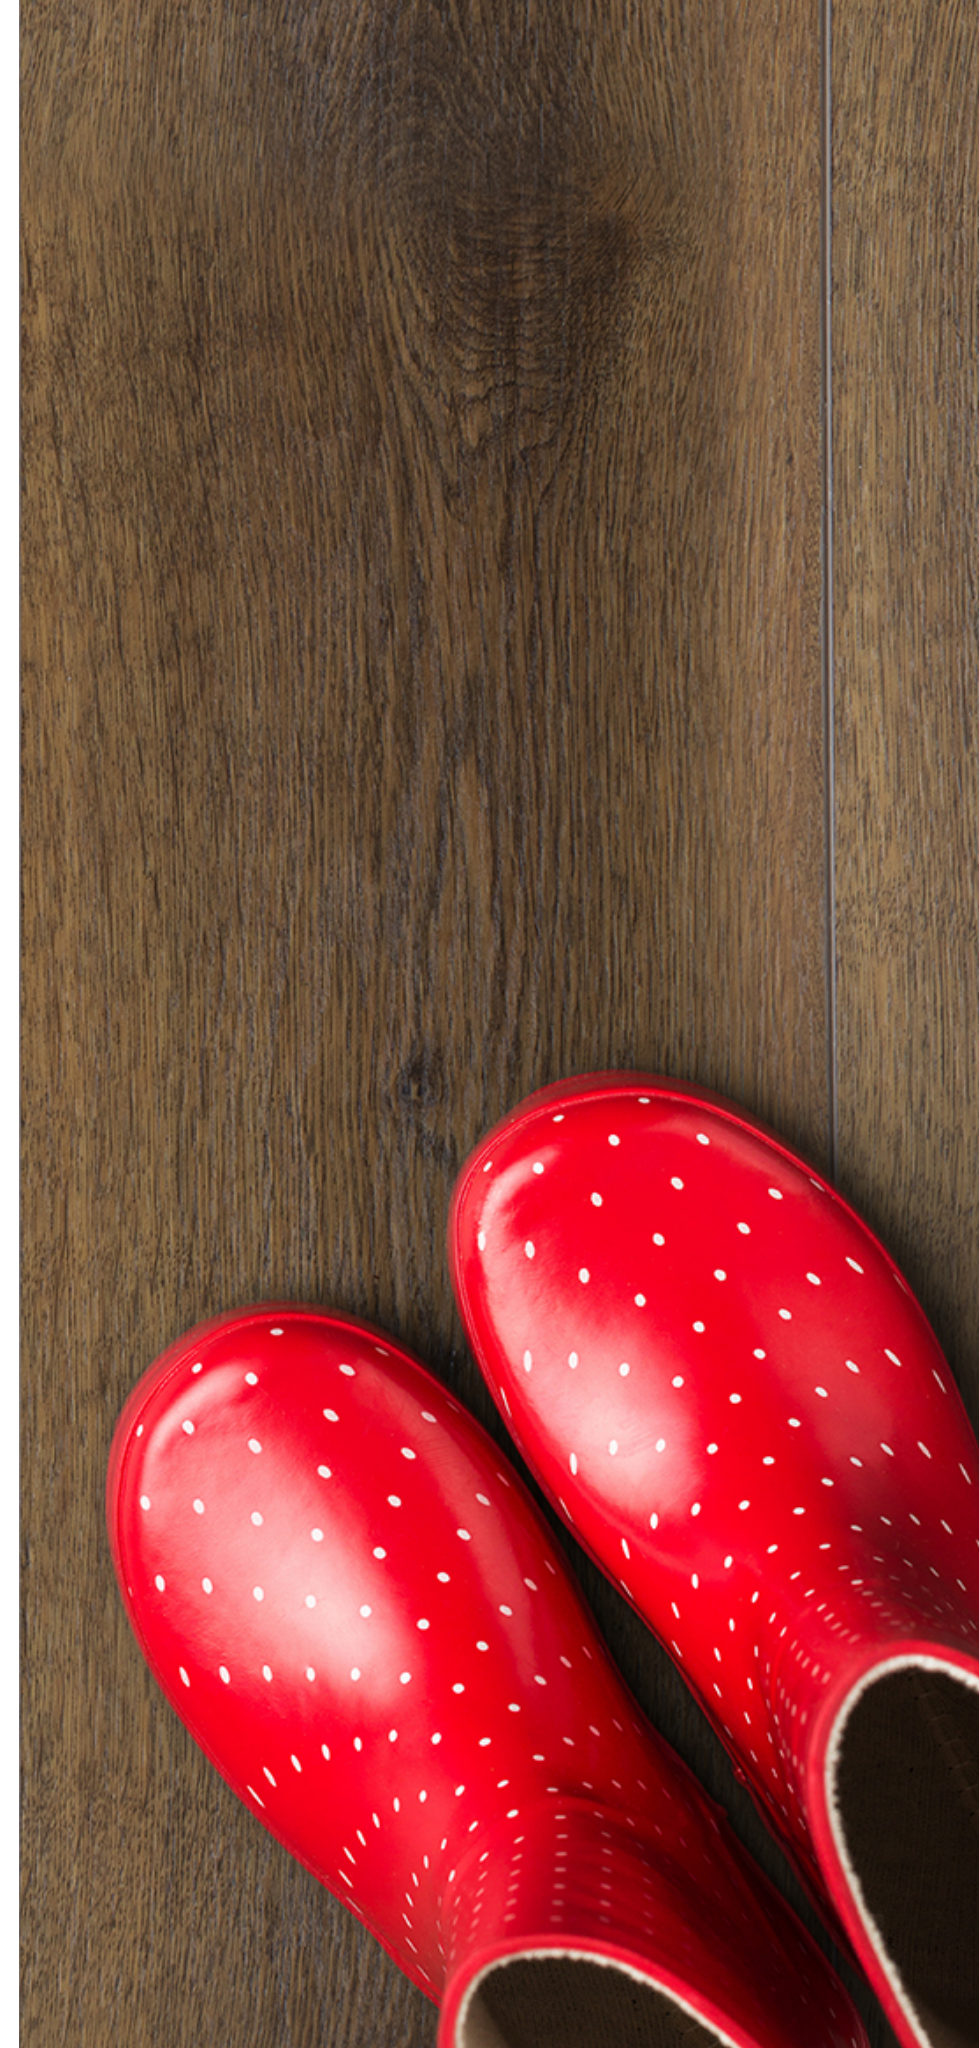

Axis:

- 1) "The central part in a structure to which other parts are connected."
- 2) "A main line of direction, motion, growth, or extension."

FEATURES

All AXISCOR floors have the following features, including the latest film and printing technologies for the most realistic visuals available.

COLLECTIONS

Performance Flooring, available in 30 different patterns, offers three collections of authentic and naturally-inspired looks: PRIME, PRO and TRIO. All collections are waterproof, pet friendly and extremely durable.

Versatrim is our partner for trim and molding needs. Located in North Carolina, Versatrim is the leading manufacturer & supplier of trims and moldings in North America. Versatrim manufactures color-coordinating, waterproof moldings and trims for all AXISCOR patters.

Versatrim offers AXISCOR moldings direct to retailers and supplies distributors with stocking programs.

MERCHANDISING DISPLAY

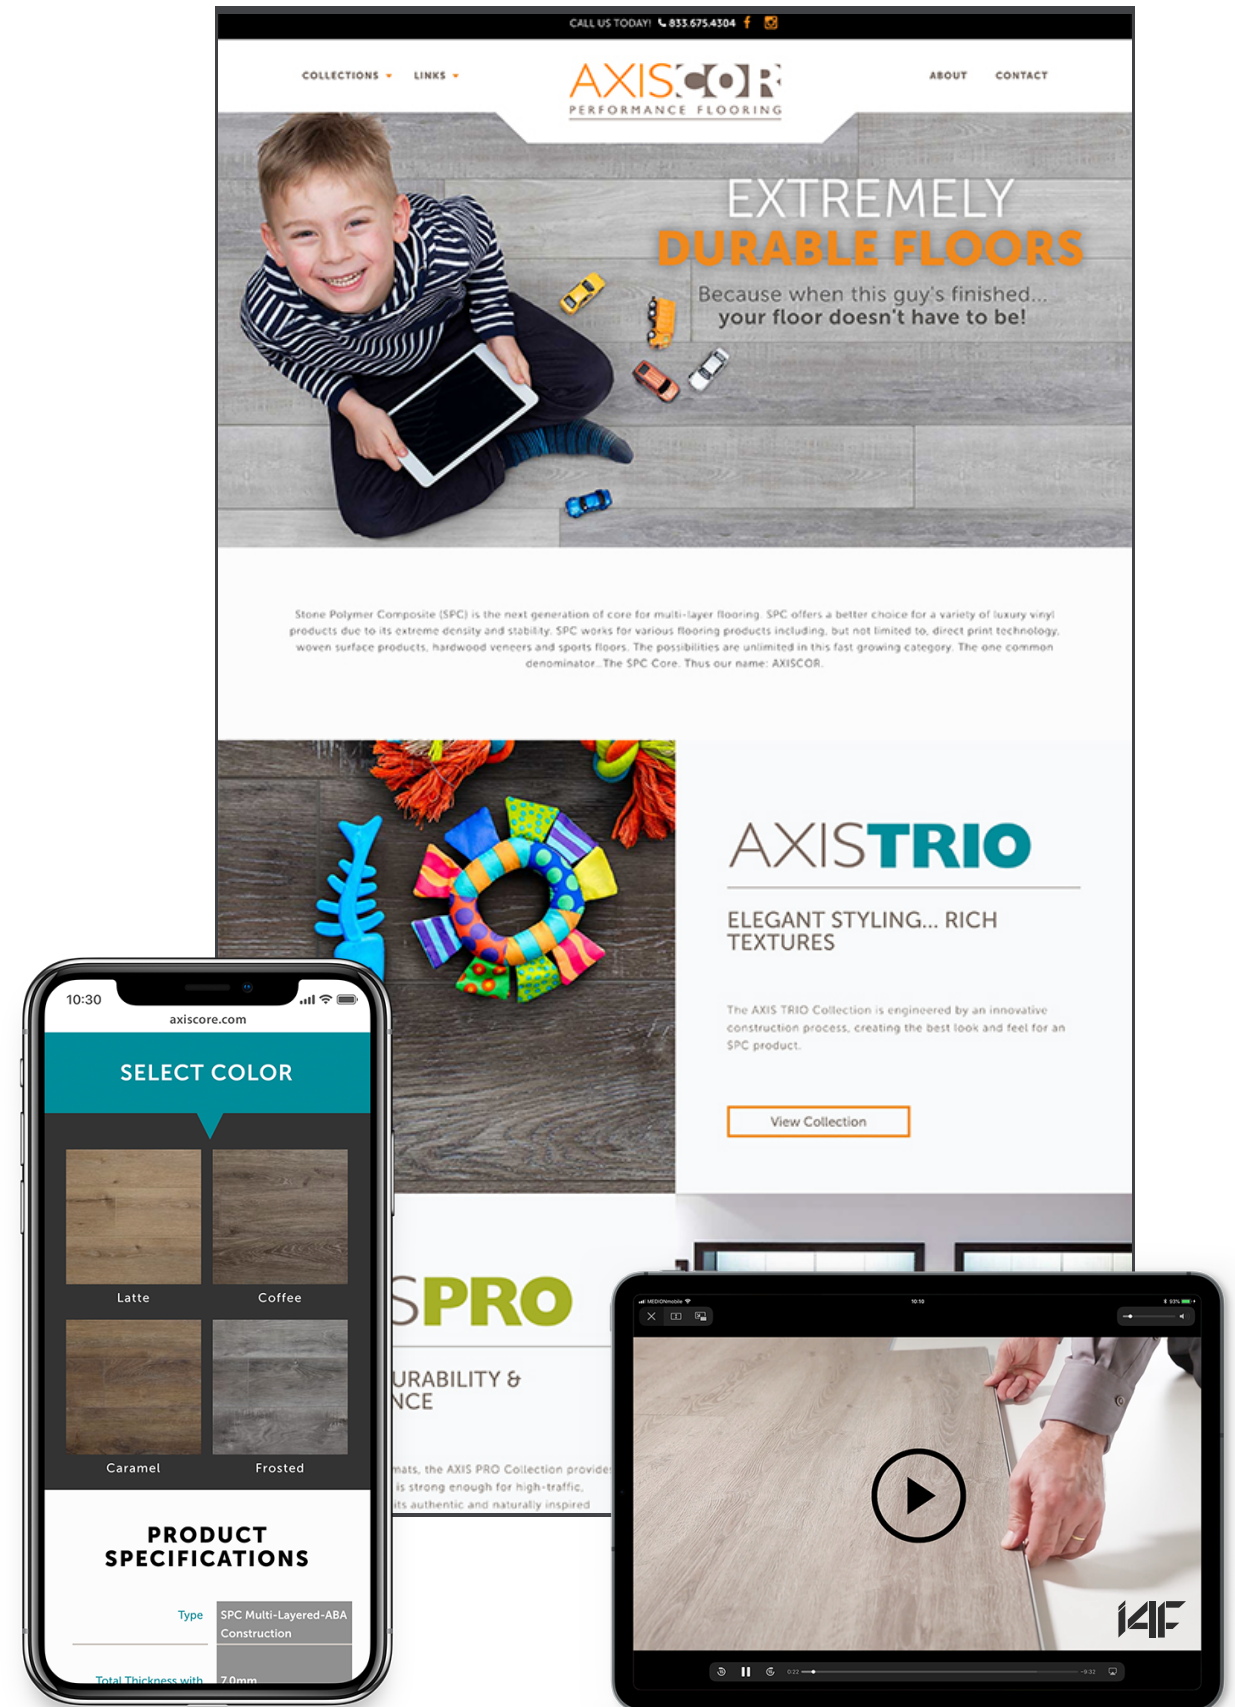

The AXISCOR merchandising display consists of large 20"x28" samples that feature the beautifully realistic planks and tiles. The three separate towers make for easy placement in retail showrooms. The display has a small foot print at only 6' wide x 5.5' tall x 2.5' deep. The corner labels with color identifiers make for fast, easy selections.

WEB EXPERIENCE

Axiscor.com provides detailed product information, swatch and pattern photography, retailer display registration, and more.

Resources like i4F installation videos, Versatrim moldings, care & maintenance guide, and warranty information.
